The hopes of the Tariff-makers have not been wholly fulfilled, since Sumatra leaf with 10 cent labor behind it is still imported in the face of the increased duties; but a very large measure of relief has been afforded for the Protection of New England farmers, and they sorely needed it. Two years ago they were rapidly being crowded out of the American market by importations from the Netherlands and the East Indies. To-day they are enlarging their acreage in tobacco, and are receiving good prices for an improved quality of leaf. This is one of many Connecticut interests which have felt the invigorating tonic of McKinley prosperity. It is one of many indications that the state fully appreciates the benefits of Republican legislation, and will be found in line with New York in November voting for the continuance of prosperity under President Harrison.
